

BUBBLE COVER

ISOTHERMAL COVER

RaeGuard

- Depending on the model, the isothermal cover increases or maintains the pool water temperature
- Reduced evaporation and reduced use of water treatment chemicals
- Wide range of finishes, colors and thicknesses

FLUIDRA

A GOOD INVESTMENT FOR SIGNIFICANT SAVINGS

ASTRALPOOL bubble covers offer many advantages & significant savings. Their main function is to maintain the **water temperature** at night or during colder weather, especially if your pool is heated. Compared to an uncovered pool, these covers increase water temperature by between 3 and 7°C (depending on the model).

As a secondary function, it **reduces evaporation**. This means savings in water, and also in energy consumption when the pool is heated. It also reduces the use of water treatment chemicals. Finally, it is also a barrier against **possible external dirt** by preventing leaves, dust and other foreign objects from polluting it.

FINISHES

THICKNESSES & COLOURS

Increases the water temperature*	400 µ Round bubbles			500 µ Geobubble™ bubbles		
		 Blue / Blue 3-YEAR WARRANTY	 OXO HEAT 4-YEAR WARRANTY	 gen2 Sol+Guard 8-YEAR** WARRANTY	 RaeGuard 8-YEAR** WARRANTY	 EnergyGuard 8-YEAR** WARRANTY
	Between 3 and 4°C	+7°C	+8°C	Opaque & Non-solar. Designed for heated pools. Retains heat & maintains the water temperature.	+7°C	+8°C

*The figures provided are given as an indication and the results are subject to proper use of the isothermal cover as described in the instructions.

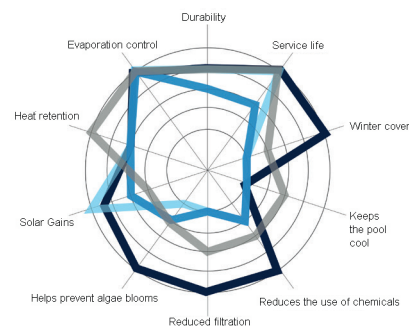

**Degressive rate of 25% per year applied after the fourth year.

GEOBUBBLE™ BUBBLES

The GeoBubble™ cover is characterized by its high resistance to UV rays and damage caused by chemical water treatments. The even-thickness design of the bubble provides increased strength and prevents the breakage points typical of traditional round bubbles.

- + Sol + Guard™: offers maximum solar energy gain
- + Energy Guard™: prevents algae blooms in the pool
- + RaeGuard™: maximizes heat retention and the reduction of evaporation.

SPECIFICITIES

Our manufacturing facility offers custom-made bubble covers for all pool shapes, including those with Roman steps, square pools, or other cutouts (such as ladder openings).

A rectangular cover with a length of more than 12 m will be made with a truss on each side. The dimensions must not exceed 25 x 5 m or 20 x 7.50 m. A foam cover is more suitable for large or indoor pools.

MANUAL or MOTORIZED ROLLERS

The roller is the essential accessory for the isothermal cover!

Makes it easy to handle and use. Wide selection of rollers to suit all needs and all budgets!
